| Seropositivos a VIH | | 27 | 3 | 25 |
| Sífilis Congénita | | 5 | | |
| Influenza | | 1 | | |

* casos probables

Recomendaciones

En virtud de la proximidad del periodo considerado como de mayor probabilidad de aparición de casos de EFE's/Sarampión/rubeola, que comprende de finales del invierno hasta principios de primavera, les recomendamos que estén atentos a los siguientes puntos principales.

- 1.- Reforzar la vigilancia epidemiológica de las EFE's, considerando como caso probable a todo caso que presente fiebre y exantema, además de al menos uno de los siguientes signos y síntomas: tos coriza o conjuntivitis.
- 2.- Fortalecer el conocimiento y las destrezas del personal de salud de primer contacto y jurisdiccional en lo que respecta a la vigilancia epidemiológica de las EFE's mediante la capacitación específica.
- 3.- Ante casos probables realizar el estudio de casos con antecedentes vacunales documentados, itinerario del caso, seguimiento de contactos y actividades de cerco vacunal (49 manzanas a la redonda del caso).
- 4.- Ante todo caso tomar muestra de suero, exudado faríngeo y orina (las dos últimas dentro de los primeros 5 días después de iniciado el exantema).
- 5.- La notificación debe ser inmediata (dentro de las primeras 24 horas de conocido el caso) por vía correo electrónico (notifica_nay@hotmail.com) o por vía telefónica al 214-56-24 o al 211-95-13.

Agradecemos el esfuerzo empleado en mantener el fortalecimiento de la vigilancia epidemiológica, prevención y control de estas enfermedades.
